## ABOUT THIS COURSE

The majority of incidents occur because personnel do not adequately identify hazards, or select ineffective controls to deal with hazards. The purpose of the course is to ensure that personnel are equipped with the hands-on skills and knowledge to identify hazards accurately and control risk within the workplace.

## PREREQUISITES

There are no prerequisites for this course.

## WHAT WILL I STUDY?

This course will cover the theory and practical functions that enable participants to effectively identify hazards, and select the most effective risk control methods. The main topics that will be covered include:

- The definitions of hazard and risk, and the differences
- Selecting effective risk controls
- Assessing risk
- Practical application of the above concepts by filling out risk assessment documentation to a high standard

## ASSESSMENT

Participants will undertake a theory assessment and a practical assessment. The theory assessment assesses whether each participant has adequate underlying knowledge to successfully conduct local risk control. The practical assessment assesses whether each participant has the requisite skills to be deemed as competent in conducting local risk control through identifying real hazards in a work area, assessing the risks associated with those hazards, and selecting the most effective controls.

## WHAT MATERIALS/EQUIPMENT DO I REQUIRE?

- Participants must wear work clothing including long-sleeve shirts, long pants and steel-capped boots.
- Workbooks, study guides and other learning material will be included within the course.

## COURSE OUTCOME

On successful completion of assessment, a nationally recognised Statement of Attainment will be issued by Broadspectrum Training Services under the competency RIIRIS201D Conduct Local Risk Control.
